Science Honors Course Application

Student spaces in Science Honors courses are limited and in high demand. Students who have previously earned an A or B in an Honors Science course can automatically move to the next honors course. Because you do not have a previous record of success in a Science Honor course, we need to understand more about your motivation for requesting this course. Your thoughtful answers to these questions will be used to evaluate you for a place in a Science Honors course.

Please type your responses to these questions and attach them to this page. **Applications that are not typed, that are turned in late, or that are incomplete will only be considered for placement on a waiting list for the requested class.** Responses will be evaluated mainly for content and not quality of writing. Remember, you want to make a good impression. Show your willingness to work hard and think deeply by writing quality responses to the questions.

1. Why do you want to take a Science Honors course?
2. What do you have to offer the learning community in a Science Honors course?
3. What in your academic history shows you are capable of being successful in a rigorous, college-preparatory course?
4. What will be challenging for you when taking a Science Honors course?
5. Anything else the Science Department should consider when making your placement?

Feel free to contact either of the Science Department Chairs if you have any questions.
